DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-14 and 18-28 drawn to a method of detecting mild impaired glucose tolerance.

Group II, claim(s) 15-17, drawn to a method of eliminating glucose in a sample.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I relies upon the determination of myo-inositol in a sample using the enzymatically using myo-inositol dehydrogenase. This special technical feature is not found throughout the claims, specifically in Group II, therefore they lack the same or corresponding special technical features and Unity of Invention is lacking.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
